Success Using Mathematics Literature Connections in the Classroom

Division of Mathematics and Science Education

THE SCHOOL BOARD OF MIAMI-DADE COUNTY, FLORIDA

Mr. Frank J. Bolaños, Chair
Dr. Robert B. Ingram, Vice Chair
Mr. Agustin J. Barrera
Ms. Evelyn Langlieb Greer
Ms. Perla Tabares Hantman
Dr. Martin Karp
Ms. Ana Rivas Logan
Dr. Marta Pérez
Dr. Solomon C. Stinson

Rudolph F. Crew, Ed.D
Superintendent of Schools

Dr. Lourdes C. Rovira
Assistant Superintendent
Curriculum Development and Instructional Support

Dr. Constance Thornton
Administrative Director
Division of Mathematics and Science Education

Acknowledgements

The contributions of the teachers who worked throughout the development of this material are gratefully acknowledged. Their expertise, creativity, and dedication are the essence of this final product. These teachers exemplify qualities of true professionals and are duly recognized:

Dionne Bryant

Elton Hilton

Lora Meade

Rosanne Phillips

Sharon Robinson

Sandra Van Cleef

Under the Supervision of Mrs. Michèle S. Weiner,
District Mathematics Supervisor,
Division of Mathematics and Science Education

Success Using Mathematics Literature Connections in the Classroom

Purpose of the *Mathematics Literature Connections in the Classroom*

The Division of Mathematics and Science Education responded to the request of administrators and teachers in the field to create a Mathematics Literature Guide to serve as a resource for teachers. At a time when the demonstration of academic achievement is imperative to a school's success, the need for proven instructional strategies increases. One such strategy is the alignment of subject areas. The alignment of instruction across the curriculum is a critical tool for students as well as teachers. The integration of subject areas reinforces the students' development of content-based concepts, as well as addressing the issue of time management for teachers. The integration of subject matter is greatly advanced through the inclusion of literature supplements into individual content areas. Literature provides a way for children to make mathematics learning much more personal. Research has shown that children assimilate new information best when it has meaning and usefulness for them. Literature is a way to give math meaning.

The National Council of Teachers of Mathematics has reported that reading, writing, discussing, representing, and listening to mathematics are essential to students' comprehension of mathematical concepts. Using literature as a springboard to spark student interest in mathematical concepts:

- engages them in authentic, "real world" experiences in which people use math for real purposes;
- teaches problem solving skills;
- offers opportunities for students to think and to reason;
- gives mathematics meaning.

Description of the *Mathematics Literature Connections in the Classroom*

This literature guide matrix contains suggested titles of books aligned by strand and concept to the Florida Sunshine State Standards to better prepare students in the curriculum area of mathematics. The literature guide was created to assist teachers in the development of mathematical concepts via the use of literature as a bridge. A majority of the titles listed in the literature guide have been implemented in professional development provided

by teachers and curriculum support specialists. Additionally, ISBN numbers have been provided within the literature guide matrix, to aide teachers in easily locating books in stores, or to assist when exploring websites, (such as <http://www.amazon.com>, or other online retailers) which provide editorial reviews, reading level preference, and other books focusing on similar concepts.

Suggestions for *Success Using Mathematics Literature Connection in the Classroom Effectively*

Some of the benefits of using the identified literature connections are listed below:

- Class discussion of the literature piece provides an informal means of identifying students' prior knowledge.
- Students' reading/language art skills are further developed and enhanced.
- Students' awareness of mathematics topics through indirect mathematics instruction is intensified.
- Students' are more open to content instruction due to an increased interest level (curiosity is heightened by the use of stories and poems).
- Stories and poems are often real world-based.
- Literature can span several age groups depending on desired content goals.
- Students can often articulate or demonstrate comprehension by acting out or re-creating a story.
- Students can better relate to and retain information in story form as opposed to isolated facts.

Disclaimer: This is by no means an exhaustive list, but a reference to guide teachers.

The School Board of Miami-Dade County, Florida, adheres to a policy of nondiscrimination in employment and educational programs/activities and programs/activities receiving Federal financial assistance from the Department of Education, and strives affirmatively to provide equal opportunity for all as required by:

Title VI of the Civil Rights Act of 1964 - prohibits discrimination on the basis of race, color, religion, or national origin.

Title VII of the Civil Rights Act of 1964, as amended - prohibits discrimination in employment on the basis of race, color, religion, gender, or national origin.

Title IX of the Education Amendments of 1972 - prohibits discrimination on the basis of gender.

Age Discrimination in Employment Act of 1967 (ADEA), as amended - prohibits discrimination on the basis of age with respect to individuals who are at least 40.

The Equal Pay Act of 1963, as amended - prohibits sex discrimination in payment of wages to women and men performing substantially equal work in the same establishment.

Section 504 of the Rehabilitation Act of 1973 - prohibits discrimination against the disabled.

Americans with Disabilities Act of 1990 (ADA) - prohibits discrimination against individuals with disabilities in employment, public service, public accommodations and telecommunications.

The Family and Medical Leave Act of 1993 (FMLA) - requires covered employers to provide up to 12 weeks of unpaid, job-protected leave to "eligible" employees for certain family and medical reasons.

The Pregnancy Discrimination Act of 1978 - prohibits discrimination in employment on the basis of pregnancy, childbirth, or related medical conditions.

Florida Educational Equity Act (FEEA) - prohibits discrimination on the basis of race, gender, national origin, marital status, or handicap against a student or employee.

Florida Civil Rights Act of 1992 - secures for all individuals within the state freedom from discrimination because of race, color, religion, sex, national origin, age, handicap, or marital status.

School Board Rules 66x13- 4A-1.01, 66x13- 4A-1.32, and 66x13- 5D-1.10 - prohibit harassment and/or discrimination against a student or employee on the basis of gender, race, color, religion, ethnic or national origin, political beliefs, marital status, age, sexual orientation, social and family background, linguistic preference, pregnancy, or disability.

Veterans are provided re-employment rights in accordance with P.L. 93-508 (Federal Law) and Section 295.07 (Florida Statutes), which stipulate categorical preferences for employment.

Revised 5/9/03
